

Logo Usage Guidelines

2020

This document is part of the Juniper Brand Style Guide.
The complete document is available on thehub.juniper.net.

All third-party uses of the Juniper Networks logo must be approved by Juniper Networks.

Juniper Networks logo

The logo represents the master brand and sits at the top of the hierarchy at Juniper.

JUNIPER[®]
NETWORKS

Spacing

To ensure maximum legibility in any situation, a minimum clear space has been defined. No other graphic elements should penetrate this area. While this is the minimum clear space, additional clearance is allowed and encouraged.

The margins are decided by the overall width of the “U” in the Juniper logo as indicated by the grey box.

Sizing

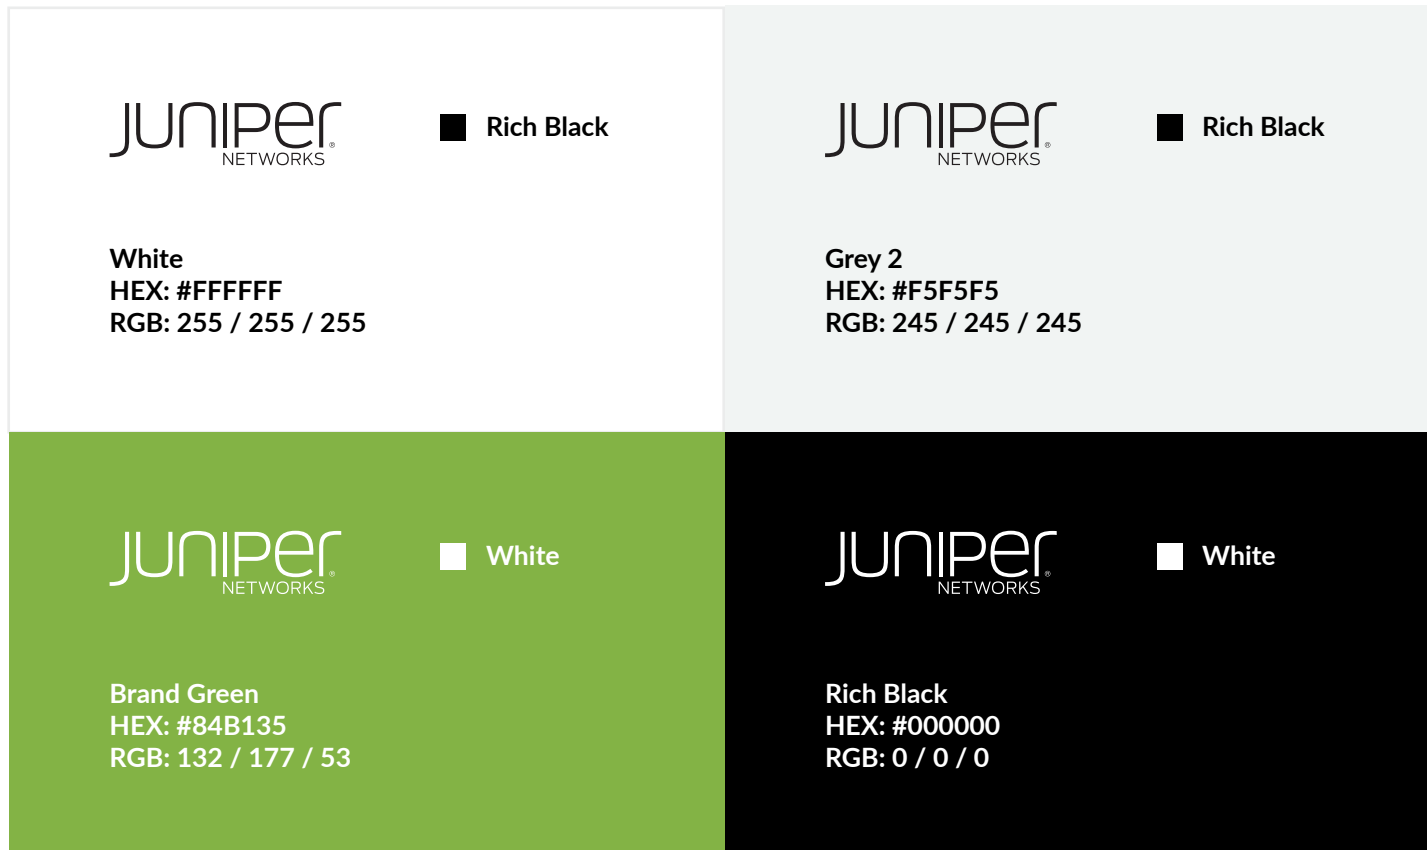

The Juniper logo is set to ensure that it never appears too small, maximizing readability and legibility at all times.

Minimum size
Print: 0.9 in, 2.286 cm
Web: 90 px

Color variations

The logo is available in multiple color varieties.
It can and should be used on only these four background colors.

Restrictions

The following examples should never appear when using the Juniper logo.

Do not scale or stretch

Do not rotate

Do not place on gradients

Do not re-colorize

Do not alter or delete "Networks"

Do not apply shadows

Do not apply low contrast colors

Thank you
